**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"> <li>1) Group 2 includes patients who had pregnancy during the last year. My query is, many of these women would still be breastfeeding their babies and this would cause a physiological hyperprolactinemia. How did you conclude 'Idiopathic Hyperprolactinemia' in this group of women?</li> <li>2) You have put 'Hypothyroidism' as an exclusion criteria factor. Mention whether it is Clinical or Subclinical or both. Subclinical Hypothyroidism may be an associated finding in Hyperprolactinemia.</li> </ol>	
<b>Minor</b> REVISION comments	<ol style="list-style-type: none"> <li>1) Mention Serum Prolactin level in ng/ml also. This is an SI unit and would be better interpreted by all.</li> <li>2) Elaborate on the action of TRH on Prolactin.</li> </ol>	
<b>Optional/General</b> comments	This is an interesting study on the relationship between Hyperprolactinemia and Infertility, worthy of sharing with your peers. So, thank you for your study.
