**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The work requires a detailed revision of English and style. For example, the wording of the text is confusing in various ideas and the figures require appropriate captions. The ambiguous use of the words figures and graphics for the same thing is not justified; the authors must use a single name for the graphical representation of data. The title of the work is inappropriate; a potential therapeutic approach for COVID-19 is mentioned but COVID-19 is mentioned only in the introduction, there is no call for attention in the discussion or conclusion of the work. The work is limited to the preparation of several films with a particular drug and the comparison of some of their properties; however, regarding a potential therapeutic approach, there is no observation or experimentation in this regard, which makes it difficult to assess the possible impact of the work. Discussion and conclusions are very limited	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
