PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Although the revised version has some remarkable improvement, it is far from satisfactory yet. Particularly, the title of this paper must be changed to use "Chou's 5-steps rule to" as pointed out in the 1st-round review report. This is because the 5-steps rule has the following merits: (1) crystal clear in logic development, (2) completely transparent in operation, (3) easily to repeat the reported results by other investigators, (4) with high potential in stimulating other sequence-analyzing methods, and (5) very convenient to be used by the majority of experimental scientists."</p> <p>If the authors can change the title accordingly, the paper can be accepted immediately due to its very importance of the topic addressed.</p> <p>The revised version has some improvement; but it is far from satisfactory yet. Nevertheless, if the authors can change the title to "Use Chou's 5-steps rules to" as suggested in the 1st-round review, the revised version can be immediately accepted owing to the importance of the topic addressed. To see the importance of 5-steps rule, search Google for the papers with their titles containing "Chou's 5-steps rule".</p>
