

SDI Review Form 1.6

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_53734
Title of the Manuscript:	PREDICTION OF THE EFFECT OF DEMOGRAPHIC CHARACTERISTICS ON PARITY USING POISSON REGRESSION MODEL
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>I think the research is interesting and the paper could be improved based on the following suggestions:</p> <ol style="list-style-type: none"> 1. The authors predict the effect of demographic characteristics on parity using Poisson regression model. I suggest the author could further improve the conclusion section by talking about the economic interpretation on policymaking or their contributions to the existing studies based on the Introduction section. 2. I think it will be clearer if the author further introduces Table 5, 6 and 7. 3. I suggest that the authors use double quotation mark and modify the following sentences. For instance , "data.table" package. The data was compiled using excel and read excel package was then used to import data into R. The data.table package in R Statistical software was used to store the read data and also for data manipulation. 4. There are some typos in the manuscript. For example, please check the following sentences. " Akaike Information Criterion and Deviance Information Criterion was used to compare the nested Poisson models to assess the model fit. " Please modify the manuscript carefully and get the interesting paper published. 	
Optional/General comments
