Compulsory REVISION comments	<p>I have read the manuscript, however, it has series of flaws that I will point here:</p> <p>1-Motivations are not clear enough and mathematical formulas are all mixed together making the manuscript looks as a draft.</p> <p>2-The topic was addressed in literature. Therefore comparing the methodology, outcomes, results...with those found in literature is a must, otherwise, novelties will not be obvious for readers.</p> <p>I am sorry but I would like to see a clear version of this work. Formulas must not be included in the text, spaces, numerated,...Motivations and updates references list must be well-done.</p> <p>A major revision is required.</p>
