

SDI Review Form 1.6

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_63084
Title of the Manuscript:	A Proposed SUSY Alternative (SUSYA) based on a new type of seesaw mechanism applicable to all elementary particles and predicting the existence of a superfluid aether composed of two new types of massless Majorana neutrinos
Type of the Article	Short Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1- The reference [4] mentioned in page 3 belongs to Edward Tryon and not to Pascual Jordan as cited by the author.</p> <p>2- The proposed theory is based on the assumption employed by Edward Tryon in 1973 on which the theory is built. Edward assumption was commented by IkJyot Singh Kohli in 2015 (arXiv: 1405.6091v6 [physics.gen-ph] 20 Mar 2016 and showed that Edward claims are not supported in full by modern general relativity theory or quantum field theory in curved spacetime. The author should extend his conclusion to stand out in the significance of Edward assumption (the Universe is a fluctuation of vacuum which consists of matter and anti-matter) in the issue of the origin and nature of the Universe.</p>	
Minor REVISION comments	<p>1- The title of the paper is too long, it can be shortened to become (A proposed SUSY Alternative (SUSYA) based on a new type of seesaw mechanism applicable to all elementary particles).</p> <p>2- Many abbreviations are seen in the text, which calls a list of abbreviations.</p>	
Optional/General comments
