PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>-The title is clear but lacks direction as it has no contextualisation. The reader cannot understand where the research was carried out with ease.</p> <p>-whereas there are arguments for the challenges of women entrepreneurs, the authors give opinions rather than reviewing literature. The authors have to do a lot in reviewing literature especially most recent literature of 2018, 2019.</p> <p>-The authors described the methods employed. This is fine, however, they did not describe the study approach (qualitative Vs quantitative).</p> <p>-The study population from which the sample size was selected was not mentioned.</p> <p>-The researchers mentioned use of the interview guide, but at the same time mention use of a three point scale tool. Did they adopt a mixed methods, interviews or questionnaires only? The proper approach mentioned here can give a well-informed analysis tool.</p> <p>-The research has neither study objectives nor research questions. How was it guided?</p> <p>-The research findings are good, however, they need to be discussed.</p>	
Minor REVISION comments	<p>-The first sentence under paragraph 3 of the methodology is incomplete. Some words are missing.</p>	
Optional/General comments
