PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is a relevant topic at a time when the global village is accommodating governance and diversity for economic development. Author/s have chosen a relevant title. It is important in those countries which still discriminate against women. I have however, taken time to go through the whole manuscript because of its positioning in the current debate. The author/s should address the issues raised before it is accepted for publication.	
Minor REVISION comments	I recommend that the whole paper be revised as suggested on the text. I have specifically suggested how they should focus it to make it scholarly.	
Optional/General comments	I am ready to review it. Once revisions are finalised, it must be forwarded to me.
