

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_55473
Title of the Manuscript:	Screening out the phytochemicals and colour values in white and black rice lines and its interrelationship
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The authors should address the concern of hyperglycemia with the consumption of white rice. Does white rice not have a higher glycemic index? I have a question on the following "White rice is a widely consumed in the form of milled and parboiled [3]. It does not contain β - carotene, lutein and zeaxanthin. There are many special cultivars of rice that contain different color pigments, such as red rice and black rice" DO the authors mean to say that rice contains lutein, its isomer zeaxanthin, or beta-carotene? The authors talk about biofortification, but refrain from mentioning that the gene for beta-carotene has already been inserted in some grains of rice.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
