

SDI Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_67871
Title of the Manuscript:	Interactive effect of elevated CO2 and drought stress on anatomical configuration in Brassica Species
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/10/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The present study deals with the evaluation of the spatial and functional aspects of plant root and shoot anatomy under elevated CO2 condition and aims to provide data base for simulation models for cultivation of tested species. The first observation regards English language. It is absolutely necessary that the authors perform an English language review of the whole manuscript. You should contact some professional English language editing service in order to check the whole manuscript. You have serious language problems: e.g. spelling mistakes, phrases without sense, phrases without verbs. Another observation is related to the introduction. Authors should add information on the species specifically, in order to highlight if similar studies on the species were performed. This should allow to emphasize originality and it should be added. If there are no such studies, please mention. At the same time, connections with similar studies on the species should be performed also in the discussion section in order to clearly state what your study brings in novelty when comparing to them.	
Minor REVISION comments	In the introduction, please add the scientific name of all plants you describe, some only have common name. Formatting of the whole manuscript should also be performed.	
Optional/General comments	Authors should perform all the changes suggested above. In the present form, the manuscript needs some changes in order to be properly presented.
